

APPENDIX:

Official Statement on Nicotine E-Liquid

AVCA Vendor Certification

Consumer Bill of Rights

AVCA Vendor Survey – May 2016

Signatures of Support from Community

OFFICIAL STATEMENT REGARDING THE SALE OF NICOTINE E-LIQUID IN THE RETAIL MARKET – CONSUMERS

Retail Purchase of E-Liquid containing Nicotine:

We believe that consumers, 18+ should be able to purchase nicotine containing e-liquid on the retail market as a consumer product with only standard GST applied and collected and not as a tobacco product.

Rationale/Objectives:

- Nicotine based e-liquid should be exempt from all tobacco excises and taxes as those means of revenue are there to support the additional costs to the public health system that are directly associated with combustible tobacco use, and those same known, long term harms are not present with the use of nicotine e-liquid.
- We believe that the management and regulatory strategy to be applied should be done in a manner to ensure readily available access to nicotine e-liquid for all New Zealanders, maintaining multiple affordable avenues for purchase by adults 18+ for their personal use as with all other consumer product for adults that are sold in the retail market in New Zealand.

Importation For Personal Use:

We believe that the amount of liquid nicotine for dilution to be imported should be **no less** than 500mls for a 3-month period for personal use (2 litres of dilute liquid nicotine per annum).

Conclusion:

All of the foregoing should be managed in such a way that there will be no punitive additional taxation or handling fees applied to the consumer for the import, or purchase of either liquid nicotine and/or nicotine containing e-liquids.

Amended Jul 2016

AVCA DOCUMENT FOR VENDOR CERTIFICATION (1/5)

- 1. Purpose:** This document contains those requirements for any New Zealand Vendor who wishes to carry the AVCA Certified designation on their products that they need to comply with.
- 2. Scope:** The purpose of this PAS is to specify guidance for manufacture, importation and sale of electronic cigarettes and directly related products (“Vaping Products”, “VP”), and testing methodologies. It gives guidance on the manufacture and testing of these products.
- 3. Terms, Definitions & Abbreviations:** There is an extensive list of terms, definitions and abbreviations included in the PAS. Most of these will be obvious to anyone connected with this sector, but for clarity, the following terms have been defined as follows:

diluent

base liquid used to dilute concentrations of nicotine

electronic vapouriser aka electronic cigarette (e-cig)

device which utilises battery power to heat an atomiser to transform e-liquid into an aerosol vapour for inhalation

excipient

base liquid used to create e-liquid to which nicotine may or may not be added

free e-liquid

e-liquid supplied in packaging separate from hardware

hardware

devices for use with e-liquid but which may be supplied without e-liquid

MSDS/SDS

Material Specifications Data Sheet/Safety Data Sheet - used to provide compounds and active ingredients on a % basis of product composition.

pre-filled e-cig

device for inhalation of e-liquid aerosol where battery, atomiser and e-liquid cartridge form a composite whole, or where pre-filled replacement cartridges are designed only for use with the original device (commonly referred to as ‘1st generation’ products)

refillable e-cig

device for inhalation of e-liquid aerosol which utilises an open tank system for holding e-liquid, and which tank can be refilled from provided and/or separately purchased e-liquid (commonly referred to as ‘2nd and 3rd generation’ products)

small vendors

small manufacturing business with fewer than 3 employees, producing niche and/or artisanal vaping products for sale to the public and/or to resellers

substantial modification

changes to products which materially alter the consumer risk profile (CRP)

vaping products (VP)

term used to describe the wide range of products in the sector as a whole, and which includes both nicotine and non-nicotine containing products

(Please note that there are many more terms defined, but the ones not listed here would be relatively obvious to anyone involved in the sector. The same applies to the abbreviations.)

Abbreviations

TRA Toxicological Risk Assessment

UBR Unique Batch Reference

VP Vaping Products

AVCA DOCUMENT FOR VENDOR CERTIFICATION (2/5)

4. Vaping product safety and quality:

E-liquid manufacturing facilities

- Clean rooms need to conform to NZ Food standards.
- Each manufacturer must hold at least an NZQA Food Safety Certificate.
- Personal Protective Equipment
- Traceability of all ingredients throughout the supply chain
- Proper batch control, to reduce the negative impact of product recall procedures, should these become necessary.
- EP/USP (pharmaceutical) grade diluents (PG/VG) and nicotine, with supporting documentation including Certificate(s) of Analysis and Certificate(s) of Conformity
- Base liquid nicotine concentration verification before manufacturing finished e-liquids, by titration, isotope dilution analysis, or other suitable method. This can be provided by the commercial source of the product, and should be indicated on the SDS/MSDS that each manufacturer will keep as part of the batch/lot inventory process.
- Food grade flavourings, sourced from Certified commercial manufacturers, whether natural or artificial, except naturally-extracted tobacco flavourings (including Tobacco Absolute). – all flavourings should have an SDS, MSDS and each manufacturer is required to keep same on manufacturing site, for each flavouring utilised as part of the batch/lot inventory process.
- Natural extracts should be additionally subject to a TRA (see below), and removed from the manufacturing process if a problem is identified by the TRA.
- Product recall procedures to ensure that resellers all the way through the supply chain are informed immediately if a product recall is instigated
- Lists the documentation manufacturers should have for each product (including hardware as separate from e-liquids), such as information on ingredients, test reports, MSDS/SDS, TRAs, etc., and outlines the requirements for Technical Dossiers (for each product)
- Recommends a Toxicological Risk Assessment (TRA) for each chemical component of the ingredients and emissions (including from atomising hardware). (NB: It is not necessary to repeat TRAs for the same flavouring compound or other ingredient, so TRAs can be reused across a wide range of e-liquid products which all use the same ingredients and/or flavouring compounds.)
- Includes recommendations for substantial modifications to products (e-liquids and/or hardware), to trigger a new Technical Dossier if the Consumer Risk Profile (CRP) is altered by the modification (unless for exempted mods)

AVCA DOCUMENT FOR VENDOR CERTIFICATION (3/5)

5. Vaping product packaging and instructions

A. Full List of ingredients:

- Diluent(s): PG/VG and % of each
- Flavouring(s)
- Liquid Nicotine (if applicable with warning):
- Batch:
- Expiry: (12 months from DOM).
- Additional Labelling guidelines:

Labels should not contain adolescent attention grabbing images or designs in no instance should the mirror or resemble common food items (ie. cocoa pops, strawberry milk, donuts etc)

B. Example of Compatible Label:

CAUTION:
Store locked up and out of the reach
of children & pets
Only for use in electronic cigarettes*
Seek medical advice if you feel unwell

C. Packaging:

- Child-resistant and tamper-evident packaging
- Marking/statement that sale is for over 18s only
- Allergy warnings for nuts and PG (where appropriate)
- Shelf-life should be indicated, and the product should remain within specification throughout the stated shelf-life
- Bottles should be fitted with a delivery spout capable of accurately delivering refill liquid into the appropriate part of the atomising device without spillage
- Recommendations about giving advice and/or warnings to consumers.
- If manufacturers wish to include these, this should be simply stated as: "If you have any concerns about your health when using this product, please consult your doctor or other healthcare professional."

AVCA DOCUMENT FOR VENDOR CERTIFICATION (4/5)

6. Hardware

All hardware that contains any electrical wiring or switches (as defined by electronic cigarette components that do not include e liquid) shall be authentic and not knock offs or clones. Original OEM equipment sold in the original OEM packaging.

All electrical equipment sold in New Zealand needs to conform to Standards listed under Schedule 4 of the Electricity (Safety) Regulations 2010; AS/NZS 3820:2009 and/or be certified CE (EU Certified for sale)

A. Hardware manufacturing :

Recommendations to ensure traceability for all components used in the manufacturing process, thus considerably reducing the negative impact of product recalls should these become necessary; also recommendations for cleaning of hardware prior to shipping/packaging to ensure that microbial contamination is minimised. (Exclusively hardware manufacturing facilities do not need to be to the same high standard as those for manufacturing e-liquids.)

B. Batteries and Battery Safety:

Batteries to be sold in New Zealand are only to be authentic brand name batteries. It is the vendor's responsibility to ensure that all batteries sold under their auspices are authentic brand name batteries and not rewraps.

Batteries will be sold that are appropriate to the device for which they will be utilised. Customers to be given an explanation of the importance of battery safety including but not limited to the appropriate transportation of batteries in cases or condoms for safety reasons; how to recognise and rectify a damaged battery wrap through rewrapping of battery and/or safe disposal of battery.

In the occasion where a vendor rewraps a battery, the identity of the wrapped cell must be clearly printed on the wrap itself with all the identifying information that was contained on the original cell.

C. Mods - Regulated & Unregulated (Mechanical)

Hardware manufacturing recommendations to ensure traceability for all components used in the manufacturing process, thus considerably reducing the negative impact of product recalls should these become necessary; also recommendations for cleaning of hardware prior to shipping/packaging to ensure that microbial contamination is minimised.

Mod hardware, where electronic circuitry is employed will always be genuine. Vendors will endeavour to advise people to follow the manufacturer's guidelines with regards to Safely charging regulated mods whether they contain an internal battery, a USB port for internal charging of a removable battery or a removable battery that needs to be charged in a separate charging station.

Mechanical mods can pose a significant safety threat in the hands of an ill informed and ill equipped user. Vendors will not supply these devices to new users without making them aware that these are advanced devices and users must have appropriate knowledge of both battery safety and Ohm's Law.

AVCA DOCUMENT FOR VENDOR CERTIFICATION (5/5)

D. Atomisers/RBA's:

Atomisers that come with premade coils or RBA's which are rebuildable atomisers (with or without a separate tank part for holding e-liquid). Whether they be authentic or clones, as well as any accessories, be they authentic or compatible (as some accessories are compatible across brands and models), for said atomisers: premade coils, tank glass/plastic components, air intake regulators, building decks, screws and peek insulators, wick material, wires and gaskets/grommets utilised by these systems. It will be the sole responsibility and discretion of the vendor if they choose to sell cloned, 1:1 RBA systems with the proviso that the customer will be advised that the item is either authentic or cloned and that said item is covered for warranty the same as any other item sold.

E. Procedures for Hardware Failure/Product Defect:

In the event that a product sold by a vendor should be DOA or shown to have defect in manufacturing that is not easily remedied through a simple means (coil change for example), the vendor will offer the consumer an in kind swap of the equipment to replace the defective item. All equipment sold by Vape Vendors in New Zealand is held to be guaranteed by the Consumer Guarantees Act unless otherwise noted at time of sale.

F. Procedures for Product Recall:

In the event that a particular vaping product is recalled, whether it be e liquid, hardware or batteries, the vendor will make every effort to contact the relevant parties, of said recall and make every effort to reclaim the recalled items as soon as possible and offer replacement in kind.

Amended Aug 2016

VAPER CONSUMER BILL OF RIGHTS (1/2)

Purpose: This document outlines those guarantees that the vaping consumers of New Zealand want from New Zealand Government and New Zealand Vendors of electronic cigarettes/hardware, e liquids and accessories.

- 1. Availability of E liquids containing Nicotine within New Zealand:** We, the consumers believe that is our right that nicotine containing e liquid should be made available, legally, on the retail market as an 18+ consumer item and not be punitively regulated or taxed as a tobacco product as it is NOT a tobacco product.
- 2. Vaping product safety and quality - E Liquids:**
 - **E Liquid Manufacturing:**
 - Consumers need guarantees that all manufacturers of e liquid in New Zealand conform to the following:
 - All ingredients must be of USP/BP and Food Safe quality/certification with supporting documentation including Certificate(s) of Analysis, Certificate(s) of Conformity and/or Safety Data Sheets (SDS)/Material Safety Data Sheets (MSDS)..
 - Proper batch control, to reduce the negative impact of product recall procedures, should these become necessary.
 - Product recall procedures to ensure that resellers all the way through the supply chain are informed immediately if a product recall is instigated.
 - **Requirements for Packaging:**
 - Child-resistant and tamper-evident packaging
 - Marking/statement that sale is for over 18s only
 - Allergy warnings for nuts and PG (where appropriate)
 - Shelf-life should be indicated, and the product should remain within specification throughout the stated shelf-life
 - Bottles should be fitted with a delivery spout capable of accurately delivering refill liquid into the appropriate part of the atomising device without spillage
 - Recommendations about giving advice and/or warnings to consumers.

VAPER CONSUMER BILL OF RIGHTS (2/2)

3. Vaping product safety and quality - Hardware

All Equipment:

All hardware that contains any electrical wiring or switches (as defined by electronic cigarette components that do not include e liquid) shall be authentic and not knock offs or clones. Original OEM equipment sold in the original OEM packaging.

All electrical equipment sold in New Zealand needs to conform to Standards listed under Schedule 4 of the Electricity (Safety) Regulations 2010; AS/NZS 3820:2009 and/or be certified CE (EU Certified for sale)

Batteries and Battery Safety:

- Batteries to be sold in New Zealand are only to be authentic brand name batteries. It is the vendor's responsibility to ensure that all batteries sold under their auspices are authentic brand name batteries and not rewraps.
- In the occasion where a vendor rewraps a battery, the identity of the wrapped cell must be clearly printed on the wrap itself with all the identifying information that was contained on the original cell.

Mods - Regulated & Unregulated (Mechanical)

Mod hardware, where electronic circuitry is employed will always be genuine. Vendors will endeavour to advise people to follow the manufacturer's guidelines with regards to Safely charging regulated mods whether they contain an internal battery, a USB port for internal charging of a removable battery or a removable battery that needs to be charged in a separate charging station.

Atomisers/RBA's

It will be the sole responsibility and discretion of the vendor if they choose to sell cloned, 1:1 RBA systems with the proviso that the customer will be advised that the item is either authentic or cloned and that said item is covered for warranty the same as any other item sold.

4. **Procedures for Hardware Failure/Product Defect/Recall:**

In the event that a product sold by a vendor should be DOA or shown to have defect in manufacturing that is not easily remedied through a simple means (coil change for example), the vendor will offer the consumer an in kind swap of the equipment to replace the defective item. All equipment sold by Vape Vendors in New Zealand is held to be guaranteed by the Consumer Guarantees Act unless otherwise noted at time of sale.

| Other (please specify) | | |

AVCA Appendix: Ministry of Health Policy Document(s): E-Cigarettes

| | |
|-------|----|
| Total | 99 |
|-------|----|

Other Responses:

The first three all equally not fused on distance to vendor

Availability of assistance with nicotine

Mix of reputation, advice and guidance

Reputation and willingness to go the extra mile to help

All of the above

Good product

Fast delivery

6. Overall, how satisfied or dissatisfied are you with vape vendors in New Zealand?

| | | |
|------------------------------------|--------|------------|
| - | 73.00% | |
| Very satisfied | | 73 |
| - | 21.00% | |
| Somewhat satisfied | | 21 |
| - | 4.00% | |
| Neither satisfied nor dissatisfied | | 4 |
| - | 2.00% | |
| Somewhat dissatisfied | | 2 |
| - | 0.00% | |
| Very dissatisfied | | 0 |
| Total | | 100 |

7. With regards to e-liquid made in New Zealand, which is the most important for you:

| | | |
|---------------------------|--------|-----------|
| – | 24.24% | |
| Price | | 24 |
| – | 56.57% | |
| Flavour Profiles | | 56 |
| – | 7.07% | |
| Availability | | 7 |
| – | 12.12% | |
| Manufacturing Environment | | 12 |
| Total | | 99 |

8. Regarding nicotine for personal use:

| | | |
|---|--------|-----------|
| – | 51.04% | |
| I purchase my own nicotine overseas and then add it myself | | 49 |
| – | 16.67% | |
| I purchase my own nicotine overseas and then have a vendor assist me with adding nicotine | | 16 |
| – | 27.08% | |
| I purchase premixed nicotine e-liquid from overseas | | 26 |
| – | 5.21% | |
| I do not use/need nicotine in my e-liquid | | 5 |
| Total | | 96 |

9. Regarding E-Liquid in General:

I purchase my own supplies and "DIY" my own e-liquid (either with or without nicotine)

14.29%

14

I purchase "doublers" locally (within NZ) and add my own nicotine or VG/PG

20.41%

20

I purchase pre-made e liquid, just open and vape

65.31%

64

Total: 98

Aotearoa Vapers Community Advocacy (AVCA)

Recipient: Dr. Jonathan Coleman, Minister of Health, New Zealand Government

RE: Legalisation of Nicotine E-Liquid for Retail Sale in New Zealand

The signatories below respectfully request that the minister accept our signatures, as provided for below, from an online petition at change.org as our submission of opinion, belief and support that nicotine e-liquid should be made legal for retail sale in New Zealand as an 18+ consumer product not subject to undue taxation, excise fees or punitive licencing fees or restrictions.
